---

Education

APS College of Engineering, Bengaluru
B.E. in Electronics and Communication Engineering (2021 – 2025) CGPA: 8.64

Technical Skills

Programming Languages

- Java: Oops, Classes & Objects, Inheritance, Polymorphism, Encapsulation, Abstraction, Collections, Exception Handling.
- JavaScript: DOM manipulation, Event handling, Async programming (Promises, async/await), Closures, Scope.

Web Development

- React: Components, Props, State Management, Hooks, API Integration, UI Rendering
- HTML: Semantic elements, Forms, Tables, Media embedding
- CSS: Flexbox, Grid, Responsive design, Media queries

Backend & Databases

- Java Spring Boot: REST APIs, Controllers, Dependency Injection, JPA/Hibernate
- SQL: SELECT, INSERT, UPDATE, DELETE, Joins, Subqueries, Normalization, DDL/DML/DCL/TCL

Tools and Platforms

- Eclipse
- VS Code
- Arduino

Projects

1. **Smart Notice Board System**

To replace traditional paper-based notice boards with an IoT-based smart notice board. The project successfully demonstrates an IoT-based smart notice board that enhances communication efficiency and accessibility, making it a practical alternative to traditional notice. Enabled wireless communication from ESP8266 to backend for real-time updates.

2. **RFID-Based Attendance Management System**

Java Spring Boot, React, MySQL, ESP8266 - Developed a complete attendance automation system using RFID. Implemented Java-based backend for RFID validation, attendance logging, and student data management. Designed a React dashboard for real-time attendance monitoring and data visualization. - Utilized MySQL for secure storage of logs and student information.

Internships

Intern at Xtrans Solutions
The internship report titled “AIoT” focuses on the integration of Artificial Intelligence (AI) and the Internet of Things (IoT) to develop an intelligent system. Conducted at XTrans Solutions in collaboration with VTU-VRIF, this project aims to enhance automation, decision-making, and user interaction through AI-powered IoT applications.
